### Manager's Corner

"July is hollyhocks and hammocks, fireworks and vacations, hot and steamy weather, cool and refreshing swims, outdoor picnics, and vegetables out of the garden." This year, the 4th of July (Independence Day) holiday falls on a Tuesday, and it is one day after the first of three full moons of the summer season. Our July full moon is called Buck Moon because it corresponds with the time young buck deer begin showing antlers. It is also called Thunder Moon because of the prevalence of thunderstorms at this time of year. July's full moon is the first of four "supermoons" that will occur in 2023. There are also two meteor showers happening during the month of July, Perseids 7/17-8/24 and Delta Aquarids 7/28-7/29. Enjoy your summer!

## Happy Independence Day!

The 4th of July has been a federal holiday in the United States since 1941, but the tradition of Independence Day celebrations dates back to the 18th century and the American Revolution. On July 2, 1776, the Continental Congress voted in favor of independence from British rule, and two days later delegates from the 13 colonies (New Hampshire, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, and Georgia) adopted the Declaration of Independence, a historic document drafted by Thomas Jefferson. From 1776 to the present day, July 4th has been celebrated as the birth of American independence, with festivities ranging from fireworks, parades, and concerts, to more casual family gatherings and barbecues. Wishing you a happy 4th of July!
